Claims 1, 6-13 and 15-18

Documents 1 and 2

Document 1 describes (1) that cartoon characters are selected at terminals, (2) that cartoon character display data and schedule files are downloaded from a second server, and (3) that information files are downloaded from a third server indicated in schedule files.

Document 1 describes matters that correspond to a means of storage and a means of image data transmission in claim 1.

As described in document 2 ([0030]-[0032]), a technology of selecting an appropriate cartoon character according to the attributes of the user is well known.

In addition, downloading an information file from a third server indicated in a schedule file means downloading contents related to a cartoon character, so the means of selecting contents of claim 1 could have easily been conceived of from document 1.

Accordingly, a person skilled in the art could have easily conceived of the subject matter of claim 1 in view of cited documents 1 and 2.

Similarly, a person skilled in the art could have easily conceived of the subject matters of claims 3, 6-13 and 15-18 in view of cited documents 1 and 2.

Continuation of: V.2

Claim 2

Documents 1-3

The schedule file in document 1 is recognized to be a kind of user feature information. In addition, as mentioned in documents 2 and 3, choosing contents based on the user features is well known.

Claim 3

Documents 1-3

Document 3 (paragraph [0015]) describes that "pieces of music or images for which a user 1 provides execution instructions or that Mr. DJ chooses and arranges are evaluated to use for selection of pieces of music in the future."

Accordingly a person skilled in the art could have easily conceived the subject matter of claim 3 in view of cited documents 1-3.

Claim 4

Documents 1-3

A charging technology for contents are well known, and a person skilled in the art could have easily decided charging for contents as a matter of design variation as required.

Claims 14 and 15

Documents 1-4

A feature wherein identification information is read from an object holding such information, a feature wherein identification information is transmitted, and a feature wherein image data to display an image that corresponds to the appearance of an object is received, are described in document 4.
